Features & Benefits of the SKF HD Tensioners

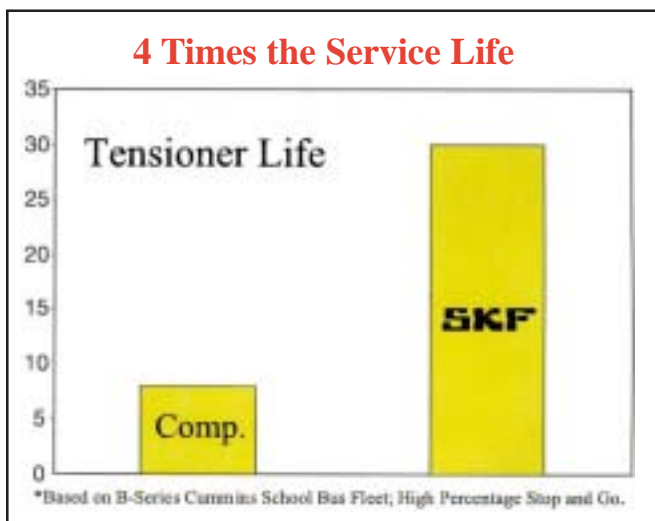

- 1) **ROUND WIRE SPRING:** Premium chrome silicon steel material for reduced tension decay
- 2) **"NOOSE RING":** Reduces tensioner motion for improved life
- 3) **LABYRINTH SEAL:** Stop contamination from internal components
- 4) **TANDEM 6303 BEARINGS:** Higher load capacity with long-life synthetic grease
- 5) **FORGED STEEL PULLEY:** Precision machined running surface
- 6) **PIVOT SHAFT:** 22mm diameter or larger pivot, electroless nickel plated for longer life
- 7) **PLATE SEAL:** Stops contamination of internal components
- 8) **SEALING CAP:** Prevents contaminant intrusion

SKF Heavy Duty Tensioners

**Reduce down time and costly repairs with the SKF HD Tensioner.
Durability and reliability you can count on.**

- SKF's Aftermarket Tensioners are the most robust tensioners available (+400k mile durability)

- Field and Lab testing confirms they last up to 3 times longer than competitive flat spring tensioners
- SKF's aftermarket tensioners cost the consumer about 1/3 less than the OE service part
- The SKF design is the result of cooperation between the world's largest tensioner supplier, OE manufacturers and fleet operators

- HD Idlers also available
- Provides longest Service Life available in aftermarket.

LEADING TECHNOLOGY PROVIDES LONGEST LIFE AVAILABLE

- Patented "Proportional Dampening" with round spring technology maintains constant tension and system dampening for extended belt and component life.
- Increased ball bearing grease fill with special high temperature synthetic grease is designed specifically for heavy truck.
- Patented "Noose Ring" technology reduces arm motion for improved system life.
- Labyrinth seal prevents contamination ingress for extended life.
- Machined forged steel pulley that provides a precision running surface for quieter performance.
- Larger series tandem deep groove ball bearings provide higher load capacity and longer service life than the competition's light duty automotive bearings.
